

Hello! Welcome to the [neighborhood] Cat Directory!

Here you'll be able to:

1. View a list of cats, and their info, in the neighborhood.
2. View a list of your neighbors (owners) and their info.
3. Add a cat as yours.
4. Remove a cat as yours.
5. Compare two cats to see if they'll get along.
6. Find what type of food will attract a certain cat.
7. Find out which of your neighbors is the crazy cat lady (has the most cats).
8. Update your info.
9. Update a cat's info.

Database

Cat <-- Neighborhood --> Owners

- 1. Cat.all --> name / owner / breed / color / temperment / fav food
- 2. Owner.all --> name / address / food provided / dog?
- 3. meowzer = Cat.new(name: "Meowzer")
dude = Owner.new(name: "Dude")
meower.owner = dude
- 4. meowzer.delete.owner
- 5. case
cat.temperment
- 6. cat.food
- 7. Owner.sort_by(number_of_cats).first
- 8. What is your name?
name = gets.chomp
What would you like to update?
1. Name 2. Address 3. Food Provided 4. Dog Status
3 = gets.chomp
name.food_provided = x
- 9. similar ^
